

A DECADE OF YONDER LIVE

In 1998, Yonder Mountain String Band united in Nederland, CO. Their first show was an opening slot at the famed Fox Theater on September 25. Since then, the band has made their way all over the country, performing over 1100 times, bringing their marathon, live shows with them, and never playing the same set twice. This special download series is a celebration of the past ten years of the band and features a live show from each year hand-picked by Yonder's very own Ben Hines, and by Yonder's very own Ben Hines, and by longtime live show archivist Pastor Tim and loyal fan Mark Burnell. Ben, Pastor Tim and Mark went through a vast archive of Yonder shows and carefully chose these shows as the most representative, monumental and non-released material they could find from each of the ten years of Yonder. They provided comments on each show. It is a decade of live Yonder music straight from the archives.

12/03/1998 - The Merc, Jamestown, CO
